

# ***SAVE the EARTH***

We got a great response in the last few months when asking you to **support us in the excessive waste of plastic water bottles**.

*We listened to your ideas and decided to sell our own refillable water bottles.*

**Amazingly, the waste of plastic water bottles in our facility dropped down over 75%.**

*Now we listened again and are going to work on the **excessive waste of paper use**.*

To limit our weekly handouts that get easily misplaced, we invested in a **new "electronic" program** that will keep you up to date with all upcoming events, dates, payment reminders and special savings right in your home.

**No More Paper Waste.**

**All you need to do this time, is to keep your e-mail address up-to-date in our files.**

*We appreciate your ideas and dedication to help us save the Earth.*

*Let us know your next ideas at [gabplainville@comcast.net](mailto:gabplainville@comcast.net)*

*We appreciate your support on becoming "Green". G.A.B. Staff*
